

Gas Field Services

Environmental Policy

Gas Field Services (GFS) is a privately-owned technical services contracting company based in Central Queensland. Our primary activities are coal seam gas drilling and well servicing, and we operate in the nearby Bowen Basin as well as the Hunter Valley, New South Wales.

Gas Field Services aims to conduct all of its activities in accordance with legislation and requirements relating to its environmental aspects, but also to demonstrate its commitment in preventing pollution resulting from the company's activities, products and services through implementation of an environmental management system complying with ISO 14001:2004 with a goal of:

NO HARM

We will achieve this through the adoption of the following objectives:

- Minimising our impacts on the environment and the larger community
- Requiring compliance with documented procedures for consistent environmentally responsible operation
- Reducing pollution generated by our activities
- Increasing and promoting the use of environmentally responsible practices
- Actively promoting environmental awareness among staff, clients, customers and the general public
- Striving for continuous improvement

Employees also have responsibilities, which include:

- Following all environmental policies and procedures
- Recognising and reporting hazards which may affect the health and well-being of the environment.

Stephen Burt,

Managing Director
